June 5, 1992

Mr. Randall N. Krekel
304 Concretion Unit Manager
U.S. Department of Energy
P.O. Box 550
Richland, WA 99352

Dear Mr. Krekel:

Re: Request for Extension of Submittal Date for the 304 Concretion Facility
Notice of Deficiency (NOD) Response Table

The Department of Ecology has reviewed your request for extension of the submittal date for the 304 Concretion Facility Closure Plan, Revision 1 NOD Response Table. Ecology concurs that it is appropriate to delay the submittal of this response to reflect the new schedules in the Tri-Party Agreement, and to provide the opportunity to respond to the recently issued Soil Cleanup/Remediation for Hanford(SCR) policy.

Ecology is anticipating the submittal of a NOD response table. This plan (304 Concretion facility) is in the last stages of development, and Ecology intends to write the final closure plan in the near future. This will require the submittal of a revised Closure Plan at a later date.

The extended submittal date for the 304 Concretion Facility Closure Plan NOD Response Table is June 8, 1992. If you have any questions regarding this subject, please call me at (206) 459-6725.

Sincerely,

Scott E. McKinney
304 Concretion Facility Unit Manager
Nuclear and Mixed Waste Management Program
